(57) Abstract

PURPOSE

A ground plate for electric pole changeable depending on the diameter of the electric pole is provided. It helps enhance effectiveness of burying and installing work for electric pole and ground plate, and distributes electricity safely to houses and buildings by guaranteeing constant earth resistance.

CONSTITUTION

A ground plate for electric pole comprises: one end of each divisible insulating plate (11-1)(11-2) connected by binding band (12), having slots (14)(14a) and protrusions (15)(15a) thereon, a clip (30) to place and fix an earth copper plate (20) firmly on a resting slot (11b) formed on a curb (11a) of the insulating plate (11-1)(11-2), an earth stick (23) riveted to the earth copper plate (20) to make a connection with an earth line in the electric pole.
